Subject: RE: Tinkham Garage Site - Groundwater Management Permit Monitoring Requirements
Date: Tuesday, May 28, 2019 3:24:23 PM

Water levels and monitoring – sorry.

So that's good.

Subject: RE: Tinkham Garage Site - Groundwater Management Permit Monitoring Requirements

The Canons Site Group agrees to conduct a comprehensive round of groundwater monitoring, at locations where we are able to obtain access, in the May/June time frame. The Group continues to evaluate the terms of the GMP and this commitment is without waiver of the Group's rights with respect to the GMP, including a potential appeal.

Subject: Tinkham Garage Site - Groundwater Management Permit Monitoring Requirements

Good Morning Jim,

As a brief follow up to our phone call earlier, I understand that the Groundwater Management

Permit was issued late in the month of May and that the increase in the monitoring requirements would not allow it to all be completed before the end of May. Please provide a proposal for our review that outlines what you anticipate being able to complete to meet the permit requirements for 2019. NHDES and EPA can review and provide comments accordingly from that point. Thank you and talk with you tomorrow morning during our update call.

Sincerely,

-Andy
